

# PROTECT YOUR AGENCY

## IDENTIFY | PREPARE | RESPOND

Embezzlements. Stolen client data. Natural disasters. Industry regulation. Workplace violence. There are a myriad of threats that face your agency, and we're here to help.

## WE CAN HELP YOU BY...

- Conducting annual network or agency management system risk assessments
- Administering periodic penetration tests or vulnerability scans of your network's firewalls
- Installing anti-embezzlement or fraud detection procedures and protocol
- Assessing external threats such as hacking, viruses, remote access, wireless access, etc.
- Publishing internal policies on use of thumbdrives, taking laptops home, password use, etc.
- Implementing data retention and destruction policies
- Assessing your data back-up plan
- Completing business continuity and disaster recovery plans

Our credentialed professionals can help you understand where your operation stands today and provide a roadmap for the future. Contact us today!
